ELSEVIER International Journal of Coal Geology 39 (1999) 345–346

International Journal of coal geology

Contents Volume 39, 1999

William Spackman v
Handing on the torch vii

Special Issue: 14th Annual Meeting of The Society for Organic Petrology
Introduction 1

Combining organic petrography and palynology to assess anthropogenic impacts on peatlands. Part 1. An example from the northern Everglades of Florida
A.D. Cohen, C.P. Gage and W.S. Moore 3
Combining organic petrography and palynology to assess anthropogenic impacts on peatlands. Part 2. An example from a Carolina Bay wetland at the Savannah River Site in South Carolina
A.D. Cohen, C.P. Gage, W.S. Moore and R.S. VanPelt 47
Sulfur variability and petrology of the Lower Block Coal Member (Pennsylvanian) in Southwest Indiana
P.L. Padgett, S.M. Rimmer, J.C. Ferm, J.C. Hower, C.F. Eble and M. Mastalerz 97
Observations on the palynology, petrography and geochemistry of the Western Kentucky number 4 coal bed
C.F. Eble, S.F. Greb, D.A. Williams and J.C. Hower 121
Lanthanide, yttrium, and zirconium anomalies in the Fire Clay coal bed, Eastern Kentucky
J.C. Hower, L.F. Ruppert and C.F. Eble 141
Petrology of organic matter in modern and late Quaternary deposits of the Equatorial Atlantic: climatic and oceanographic links
T. Wagner 155
Application of acritarch fluorescence in thermal maturity studies
M. Obermajer, L.D. Stasiuk, M.G. Fowler and K.G. Osadetz 185
Organic facies in Cretaceous and Jurassic hydrocarbon source rocks, Southern Indus basin, Pakistan
C.R. Robison, M.A. Smith and R.A. Royle 205
The kinetic modeling of oil cracking by hydrothermal pyrolysis experiments
N. Tsuzuki, N. Takeda, M. Suzuki and K. Yokoi 227
Organic facies and thermal maturity of Late Aptian to Early Cenomanian shelf deposits, Northern Sinai (Egypt)
J. Kim, T. Wagner, M. Bachmann and J. Kuss 251

Research Papers
Chemical composition of macerals in bituminous coals of the Gunnedah Basin, Australia, using electron microprobe analysis techniques
C.R. Ward and L.W. Gurba 279
The depositional environment and mineralogical and chemical compositions of high ash brown coal resting on early Tertiary saprock (Schirnding Coal Basin, SE Germany)
H.G. Dill and H. Wehner 301

Short Communication
A comparison of electron staining agents for the transmission electron microscopy examination of coal
A. Lee and G.H. Taylor 329

Book Reviews
Organic Petrology
J.C. Hower 339
European Coal Geology and Technology
H.H. Damberger 343

Contents Volume 39, 1999 345
